SUMMARY

BS Computer Science at the University of the Philippines Cebu (graduating July 2026) with experience building full-stack web apps using Next.js, React, TypeScript, and Supabase. Delivered real-time systems, REST APIs, and ML-powered tools; gained corporate IT exposure at Lexmark/Xerox. Targeting junior Software Developer, Web Developer, or QA Engineer roles.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++

Frontend: React, Next.js, Tailwind CSS, HTML5/CSS3

Backend: Node.js, Django, REST APIs, WebSockets, NextAuth

Databases: MongoDB, Prisma, Supabase (PostgreSQL), SQL

Tools & Platforms: Git, GitHub, Vercel, Netlify, Cloudinary, Figma, Docker (basic)

Methodologies: Agile, Scrum, Project Management

EXPERIENCE

Lexmark (now Xerox)

Jun 2025 – Jan 2026

Asset Management & IT Operations Intern · Cebu City, PH

- Built and maintained internal tracking tools for enterprise hardware asset lifecycle management, improving documentation accuracy and reporting.
- Coordinated with cross-functional IT teams to ensure data consistency across systems; supported process documentation and operational reporting.

PROJECTS

Group Projects

Sportal

Jun 2025

Next.js · TypeScript · Prisma · MongoDB · NextAuth · Cloudinary · Vercel

- Full-stack tournament management platform with automated bracket generation (round-robin & single-elimination), team registration, and payment confirmation.
- Designed MongoDB/Prisma schemas and REST APIs; integrated Google & GitHub OAuth via NextAuth; deployed on Vercel.

Chedula

Jun 2025

Next.js · TypeScript · Supabase · WebSockets · Zustand · Tailwind CSS

- Appointment management system with multi-step business onboarding, Supabase auth, and a WebSocket-powered AI chat for natural-language scheduling.
- Built calendar, CRM, services management, and public booking modules using shadcn/ui and FullCalendar.

Toxic Comment Detector

Feb 2025

Python · scikit-learn · NLTK · TF-IDF · Streamlit

- Trained and compared Logistic Regression and Naive Bayes classifiers on ~160K comments; evaluated with F1, ROC-AUC, and balanced accuracy.
- Deployed interactive inference UI via Streamlit with confidence scoring — packaged as a production-style prediction pipeline.

Individual

IoT Edge Security Framework

Jun 2026 (Thesis)

Python · Decision Tree · AES/ChaCha20 · Edge Computing · Raspberry Pi

- Designing a context-aware Smart Home IoT security framework using lightweight ML for threat classification and adaptive cryptographic enforcement; evaluating via Mean Response Time, Detection Accuracy, and Energy Consumption.

EDUCATION

University of the Philippines Cebu

Expected July 2026

Bachelor of Science in Computer Science · College Scholar — 2nd Sem AY 2023–24 & 2024–25

INVOLVEMENT

Technical Volunteer — MSG 2026 · Geeks on a Beach 2024 Tech Conference · Lighting Technician for school events 2024–2025.
