SUMMARY

BS Computer Science graduate of the University of the Philippines Cebu (July 2026) with hands-on experience building full-stack web applications using Next.js, React, TypeScript, and Supabase. Delivered real-time systems, REST APIs, and ML-powered tools, with additional corporate IT experience at Lexmark/Xerox. Seeking Software Developer, Web Developer, or QA Engineer roles.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Liquid, C++

Frontend: React, React Native (Expo), Next.js, Tailwind CSS, HTML5/CSS3

Backend: Node.js, Django, REST APIs, WebSockets, NextAuth

Databases: MongoDB, Prisma, Supabase (PostgreSQL), SQL

Tools & Platforms: Git, GitHub, Shopify, Vercel, Netlify, Cloudinary, Figma, Docker (basic)

Methodologies: Agile, Scrum, Project Management

CERTIFICATIONS

- CompTIA SecAI+ (CY0-001) (ITU Online)
- ISC2 Certified in Cybersecurity (CC) — Security Governance, Core Principles, Access Controls, Network Security & Incident Response (Skillsoft)
- AWS Cloud Practitioner 2023 — Cloud Security, Access Management & Compliance (Skillsoft)
- AI in the Workplace & ChatGPT Prompt Engineering (Skillsoft)

EXPERIENCE

Lexmark (now Xerox)

Jun 2025 – Jan 2026

Asset Management & IT Operations Intern · Cebu City, PH

- Built and maintained internal tracking tools for enterprise hardware asset lifecycle management, improving documentation accuracy and reporting.
- Coordinated with cross-functional IT teams to ensure data consistency across systems; supported process documentation and operational reporting.

PROJECTS

Personal

ShelfStock

July 2026

Next.js · TypeScript · Node.js · Express · PostgreSQL · Tailwind CSS · Recharts

- Full-stack e-commerce platform with multi-currency pricing, debounced server-side search/filtering/pagination, and transactional checkout with row-level locking to prevent overselling.
- Row-level authorization, price snapshotting for historical order accuracy, and an admin analytics dashboard (Recharts) on SQL aggregates; Dockerized with CI, deployed on Vercel + Railway.

Pulse (WebRTC Peer-to-Peer)

June 2026

Next.js · WebRTC · Prisma · PostgreSQL

- Take-home technical assessment for a software developer role: a map-based social app with WebRTC video/audio calls and real-time user proximity/location, backed by PostgreSQL + Prisma.

Nexus CRM

Aug 2026

Next.js · TypeScript · Prisma · Tailwind CSS · Gemini/Groq AI

- Full-stack AI-powered CRM with pipeline/deal kanban, contact management, and an AI layer for lead scoring, relationship summaries, and follow-up drafting (Gemini/Groq), with prompt-injection mitigation.
- RBAC, audit log, Vitest/Playwright test coverage, CI via GitHub Actions; deployed on Vercel.

Kitchen Line Supply (Shopify Theme)

Aug 2026

Shopify · Liquid · Online Store 2.0 · JavaScript · CSS

- Custom Shopify Online Store 2.0 theme built from scratch: schema-driven sections, product metafields and metaobjects, an AJAX cart, and full progressive enhancement (works without JavaScript).
- Achieved 97 to 100 Lighthouse scores on the live store, including with a third-party app installed; catalog seeded through the Admin GraphQL API.

AmBot (Quantitative Trading Research)

Jul 2026

Python · ccxt · pandas · Backtesting

- Vectorized backtesting engine evaluating 7 trading strategies across crypto and 36 years of equities data, with Monte Carlo validation and strict train/test separation.
- Identified and corrected 3 of the pipeline's own methodology errors through rigorous self-validation.

NVT Ops Suite

Jul 2026

HTML · CSS · JavaScript (vanilla)

- 5 zero-dependency web apps (timezone scheduler, PH payroll calculator, JD-candidate matcher, engagement portal, workstation-compliance dashboard) built as a capability pitch for an offshore-staffing company.

RAGbot (DocChat)

Jun 2026

Python · LangChain · ChromaDB · Streamlit

- Retrieval-augmented generation chatbot answering questions over uploaded documents/URLs with inline source citations, using ChromaDB + sentence-transformers embeddings.

Group Projects

Sportal

Jun 2025

Next.js · TypeScript · Prisma · MongoDB · NextAuth · Cloudinary · Vercel

- Full-stack tournament management platform with automated bracket generation (round-robin & single-elimination), team registration, and payment confirmation.
- Designed MongoDB/Prisma schemas and REST APIs; integrated Google & GitHub OAuth via NextAuth; deployed on Vercel.

Toxic Comment Detector

Feb 2025

Python · scikit-learn · NLTK · TF-IDF · Streamlit

- Trained and compared Logistic Regression and Naive Bayes classifiers on ~160K comments; evaluated with F1, ROC-AUC, and balanced accuracy.
- Deployed interactive inference UI via Streamlit with confidence scoring — packaged as a production-style prediction pipeline.

Dungeon Descend

May 2025

Python · Pygame · Go

- Turn-based dungeon-crawler card game with a custom card/energy/combat system; partial engine port to Go.

Individual

IoT Edge Security Framework

Jun 2026 (Thesis)

Python · Decision Tree · AES/ChaCha20 · Edge Computing · Raspberry Pi

- Designed a context-aware Smart Home IoT security framework using a Decision Tree classifier for threat detection and adaptive AES/ChaCha20 switching; achieved a 63.4% reduction in mean response time and 27.4% lower energy consumption across 180 simulation runs vs. a static-encryption baseline.

EDUCATION

University of the Philippines Cebu

Graduated July 2026

Bachelor of Science in Computer Science · College Scholar — 2nd Sem AY 2023–24 & 2024–25

INVOLVEMENT

Technical Volunteer — MSG 2026 · Geeks on a Beach 2024 Tech Conference · Lighting Technician for school events 2024–2025.
